GRAYLING, MICHIGAN, JUNE 14, 1928

NUMBER 24

NAT. GUARD OFFICERS VISIT GRAYLING

PLEASED WITH CONDITIONS OF CAMP

Col. LeRoy Pearson, Col. J. S. Bersey, Col. Burt and a son of Col. Bersey, all of Lansing, arrived by auto Saturday forenoon. Col. Craft and four staff officers of the 202d Coast Artillery of the Illinois National Guard arrived on the afternoon train. The parties left soon after for Camp Grayling where they found the camp looking ideal.

The 202d Coast Artillery regiment are from Chicago. They held their first camp here last year and were stationed near the front entrance of the camp. This year they will occupy the space used by the 119th Mich. Field Artillery, close to the rifle range. Col. Kraft says he is well pleased with the new location, saying that it will be nearer to their work and more convenient to their practice.

Just to let the visitors know that the people of Grayling were glad to see them again, a few members of the Board of Trade tendered them a dinner at Shoppenagons Inn Saturday evening. While awaiting for the guests to assemble, Col. Glen Arnold of the Signal corps of Ypsilanti, and Major Evans of the air forces, and other aviators arrived by plane and joined with the other officers. Among the speakers at the table were Rev. Greenwood who made the visitors understand that we were glad to have them here; Col. Pearson and Col. Bersey of Michigan National Guard; Col. Kraft of the 202d Field Artillery; T. W. Hanson and Col. Meyers, an officer of the 6th Corps area, of the Federal army.

There is a most cordial spirit existing among the people of Grayling and the officers of the military organizations that come to our camp. And too, judging from some of the remarks made by some of the speakers, the spirit of cooperation between the Michigan and Illinois National Guard officers is excellent. In his address Col. Kraft stated that he hoped a way may be found by which their organization may be privileged to store some of their equipment in Camp Grayling so as to save transportation back and forth from Chicago to camp. And that would indicate that they were planning to come here annually, which will be glad news for the business houses here and those who enjoy camp social seasons.

Col. Meyers of the Federal army stated that the government intended to install a sewage system in camp just as soon after the closing of the summer camps as possible, which would cost in the neighborhood of \$125,000. About \$60,000 is already being spent for improvements of the camp this year. According to Col. Bersey the Military department is laying plans to attain several thousand acres to the southwest of the camp so as to extend the artillery ranges, and for general uses of the camp. Camp Grayling is already famous for being the most beautiful military camp in America and is fast becoming the most useful camp. Its usefulness is no longer confined to the lighter artillery but its ranges accommodate the largest artillery pieces in use today.

The 202d C. A. officers boast of a new search light that is equal to the large t in use anywhere in the service. The lens of this light is more than six feet in diameter. This will be in use at Camp Grayling next July 7th to 21st. The first units of the Michigan National guard are scheduled to arrive July 23rd, and the last to leave will be on August 20th.

The officers of the Illinois Guard left Saturday evening by auto for

School Notes

Editors—Isbrand Harder, Ellen Speck, Corinne Sheldon.

The final week of school is drawing to a close and picnics have been enjoyed by many of the classes.

The Campfire Girls are going camping at Kille lake Tuesday, June 19th.

The students of Grayling School are glad to have had Mr. Smith with them during the past six years and wish him the best of success in his new position.

The Baccalaureate sermon was given in the M. E. Church last Sunday evening. An excellent sermon was rendered by Rev. Greenwood.

Miss Clark—(In Ancient History) "When was the revival of learning?" Ellen S.—"Before the final exam."

Stanley—Do you play on the piano? Clara—I did until I got so big that I fell off.

Two vacations a month are recommended by a New York physician, but he fails to tell how to get them.

Mr. Cushman (in occupation class) "Name some production in which the supply exceeds the demand." Chuck W.—Trouble.

Truman L.—Says there's to be a big dance at the depot tonight. Ruth C.—Who's giving it? T. L.—Two trains are going to Charleston.

A good thing to remember And a better thing to do, Is to work with the construction gang. And not the wrecking crew.

Marie—And you flunked in your French exam? I can't understand it. Thorwald—Neither can I. That's why I flunked.

Mr. Smith—What does "As" stand for? Paul—I've got it on the end of my tongue.

Mr. Smith—Then spit it out! Quick! It's arsenic.

A dance, a date, Perhaps out late; A test, a quiz, !!! No pass, Gee whizz!!!

Michelson Memorial Church

John Wilfred Greenwood, Minister

June 17, 1928

At 10:30 a. m. the pastor will speak on the theme, "The Song My River Sings to Me." When Jesus was here on earth, he was constantly using nature to illustrate spiritual truth. It was the Master's way. Shall it not be ours?

At 8:00 p. m. the evening service will be unusual in title and material. The theme is: "The greatest question in the world." It is beautifully illustrated by artist's conceptions of Bible scenes, and is the last address in the series "Five Crises in the Life of Christ." You will want to see these pictures and hear this address. A mint of truth for High School Graduates.

"The ultimate test of a state university is the moral and religious character of its graduates."—Marion Leroy Burton, the late lamented President of the U. of M.

Whitman's small packages of brittle, peppermints and caramels are good. Made since 1842 and still going strong. Central Drug Store.

OUR NEW GRADUATES

Each year we have the pleasure of welcoming into business and social life a new group of young folks who have just completed their high school education.

These graduates bring into active being an added impetus, a new life force that carries onward with force that none can deny the business and the social activities of the community.

Each line of endeavor into which this new energy is injected feels the onward urge and in the strides of progress made, shows the great value to the community at large which this vital force brings.

Youth-power, as exemplified by the new graduates from our schools, is the basic hope of this community's future growth and prosperity.

MUSIC PUPILS TO GIVE RECITAL

MRS. CLIPPETT INVITES ALL TO PIANO AND CONCERT PROGRAM

Mrs. C. G. Clippett's pupils in piano and vocal music will give a recital at Michelson Memorial church next Monday evening, June 18th, beginning at 8:00 o'clock. In addition to the pupils, Misses Margrethe and Ella Hanson, who are home from the Bennett school of Millbrook, N. Y., are to render selections.

It is always interesting to hear what our young girls and boys are doing and the public is cordially invited to attend the recital that evening. The program to be given is as follows:

- PIANO DUET—Dance of the Fairy Queen L. A. Bugbee
WAYNE NELLIST, MRS. CLIPPETT
- PIANO SOLO—In the Month of May Francois Behr
VIVIAN NELLIST
- PIANO SOLO—To Arms March Walter Rolfe
DOROTHY WAKELEY
- PIANO SOLO—Rain Patter James H. Rogers
VIVIAN DAWSON
- PIANO TRIO—Valse L. Strehbogg
DOROTHY WAKELEY, VIVIAN DAWSON
HELEN MCLEOD
- PIANO SOLOS—Merry Villagers Walter Rolfe
A Fairy Song Ora Hart Weddle
HELEN MCLEOD
- PIANO SOLO—In the Pine Woods L. Renk
MARGARET WOOD
- PIANO SOLO—Ripples Paul Lawson
MABLE ISENHAUER
- VOCAL DUET—Carmena H. L. Wilson
MARIE SCHMIDT, VELLA HERMANN
- PIANO SOLO—Little Maid Gavotte Edwin Forest
BEVERLY SCHAIBLE
- PIANO DUET—Alsatian Fete A. Sartorio
BEVERLY SCHAIBLE, MRS. CLIPPETT
- PIANO SOLO—Dancing Butterflies J. E. Roberts
MARGARET KESSELER
- PIANO SOLO—Welcome Carl Ganschals
LORETTA SORENSON
- PIANO SOLO—Lonely Wanderer Alban Forster
ELEANOR LAND
- PIANO SOLO—On a Summer Evening Wallace Johnson
MARQUITA LAND
- PIANO DUET—Enchanted Moments Adam Geibel
MARQUITA LAND, ELEANOR LAND
- VOCAL SOLOS—His Lullaby Carrie Jacob Bond
Who Knows E. Bael
VELLA HERMANN
- PIANO SOLO—Night Scene Joseph Pastenack
FERN CHALKER
- PIANO SOLO—Fairies James H. Rogers
GEORGIANA OLSON
- PIANO DUET—Qui Vive W. Gantz Op. 12
ELAINE REAGAN, GEORGIANA OLSON
- PIANO SOLOS—Summer Morn George Eggeling
Zingalesca George Eggeling
- LADIES SEXTETTE—
Miss Marie Schmidt, Mrs. Milnes, Mrs. H. Gotthard,
Mrs. Frank Tetu, Miss Vella Hermann, Mrs. H. Jarmin
- PIANO SOLO—The North Wind Carl N. Kem
ELAINE REAGAN
- PIANO SOLO—Spinning Wheel Wilson G. Smith
JANE KEYPORT
- TWO PIANOS—Hungary Rhapsodie Mignonne Carl Koelling
MARIE SCHMIDT — NELS OLSON
JANE KEYPORT — MRS. CLIPPETT
- PIANO SOLOS—La Gondola George Reynald

- PIANO SOLO—Hungarian E. MacDowell
MARGRETHE HANSON
- VOCAL SOLOS—From the Land of the Sky Blue Water Cadman
Haymaking Needham
- PIANO DUET—Rhapsodie Hongroise No. 2 Franz Liszt
MARIE SCHMIDT, MRS. CLIPPETT

O. Rockwell of Gaylord. This was donated by the Grayling Greenhouses. All expense of the party is to be paid by the Elks so whatever was taken in goes into the fund for the hospital. The fine spirit that goes with their efforts is highly commendable and these gentlemen, who we mentioned above are to be congratulated for their thoughtfulness. The party marked one of Grayling's most pleasant affairs.

10,000 LOAVES BREAD DAILY CAPACITY

NEW OVEN AT MODEL BAKERY BIG IMPROVEMENT

A. R. Craig says he is used to having up to date apparatus to work with and has just finished installing a fine new double oven with a baking capacity of 10,000 loaves of bread daily.

"After the oven is once heated, it holds heat several days and the heat is always even and steady," said Mr. Craig. "Beneath the oven is a heavy bed of crushed fire brick that becomes very hot and continues to hold the heat even after the fire in the pit has burned out, and we can always tell just exactly the temperature of our ovens and the loaves come out evenly baked and browned. It makes no difference whether there are a dozen loaves or several hundred, the baking is just right every time."

The writer witnessed the bakers "pulling" bread from the ovens one day this week and it certainly was a grand sight to see so many loaves and all looking so clean and brown. The loaves were laid on ventilated racks for cooling and later were taken to the wrapping machine where each was enveloped in a special waxed paper and automatically sealed.

This bakery makes several kinds of bread. There is the "Home Town" loaf that is so popular among most of the families. The "Butter Crust" loaf is like the very finest kind of home made bread. It costs a little more than the other but is a kind that some housewives want. The "Potato Bread" is a round loaf and it too has won high favor. And their favorite "Salt Rising" loaf too is in big demand.

Mr. Craig is certainly a wonderful baker and knows just how to make the kinds of baked goods that the people like. A new cake machine too has just been installed. This machine increases the capacity of production and gives a much more even and finer mixture. This is used for cakes and rolls of all kinds. This bakery is already drawing trade from outside towns and it is hoped by its owner that it won't be long before he will have a patronage built up that will keep the place busy. By buying Grayling-made bread you will not only get the finest quality but will also help to build up a local industry.

ANNUAL SCHOOL MEETING MONDAY

There was a fair size attendance at the Annual School meeting Monday evening at the School auditorium. While the business that was to come before the meeting was very important, it didn't take long to dispose of it.

Due to a change in the school laws it wasn't necessary to read the financial statement of the board, thus eliminating a long, tedious job. Dr. C. R. Keyport, president of the Board of Education, called the meeting to order and Secretary M. A. Bates read the minutes of the last annual meeting, which stood approved.

The budget for appropriation for the next year, as determined by the Board was read, and was as follows:

Teachers Salaries	\$20,000
Fuel	2,500
Incidental Expenses	5,000
Officers Salaries	500
Total	28,000

This was approved and voted by the meeting.
Dr. C. R. Keyport, whose term of office expired at that time, was re-elected, receiving 42 out of the 43 votes cast, the Doctor evidently not believing in voting for himself. It was a fine compliment for Dr. Keyport and shows that he has the utmost confidence of the people. He is deeply interested in the school, and there is never any question as to where he stands, and, as in his own affairs, uses the best of judgment.

After the close of the business of the meeting the President gave the people every opportunity to ask questions and offer suggestions for the good of the school. Mr. Bates gave out a list of the teachers for the next year, as follows:

Teachers for 1928-29
Supt.—Rolland M. Bogue, Ypsilanti.
Principal and Coach—LaVere Cushman, Mt. Pleasant.
Latin and French—Neva Stinchcomb, Alma-Grayling.
Science—Roselin Lewis, Gaylord.
Commercial—Eva Francis Dorr, Grass Lake.
English—Cathryn Lee, Flint.
English and Public Speaking—Charles J. Hill, Ypsilanti.
History—Helen R. Estee, Shepherd.
Home Economics—Tressa Lindstrom, Sauls St. Marie.
Public School Music—Doris Quackenbush, Ypsilanti.
6th Grade—Thana Smith, North Branch.
6th and 5th Grade—Lila Ashdon, Mancelona.
5th Grade—Evelyn VanDyane, Mt. Pleasant.
4th Grade—Vella Hermann, Grayling.
3rd Grade—Louisa Sibley, Vanderbilt.
2nd Grade—Clarissa Dago, Springport.
2nd and 1st Grade—Margaret Fyvie, McMillan.
1st Grade—Hazel Cassidy, Grayling.
Kindergarten—Norma Burdette, Manistique.

Plan Before You Build

Many people make the mistake of not planning carefully before they start to build and their errors cost them money. One of the first things to consider is the plans. Then you want to know that your home is to be built of the right kind of material. Let us give you the benefit of our experience in selecting just the right material for you. We can save you time, money and worry, and we will win a steady customer.

Are You Proud of Your Children?

If you are, you know how inadequate words are in describing them to others. And when some other father enthusiastically shows you snapshots of his children, you'll feel ashamed and handicapped in not having some of yours.

Don't—through mere thoughtlessness—fail to get these precious pictures now, before your youngsters grow up and it's too late. We have a genuine Eastman camera, the Brownie, as low as \$2, and Kodaks from \$5 up.

MODERN KODAKS
for all-weather picture-making

WHAT ABOUT YOUR BOYS?

WE WONDER if all parents know their boys. We hear frequent complaints about the lawlessness of some boys about town. Breaking into unused property, breaking windows, stealing material and other habits of young boys sometimes lead them into committing more serious offenses later in life.

Only just recently boys entered the old mill which is not operating, doing more or less damage. That was a very serious offense, and is punishable by imprisonment. But nobody wants to see a young boy go to prison.

If the parents would only wake up to their responsibility to their children, and would guide them in their work and play, and know where they are, fewer boys would get into trouble. Let them learn to respect the rights of others. There is no call for the wilful destruction of property in order to have a good time. Firing stones thru windows in vacant buildings is wrong and parents should see that their boys understand these simple things of justice. Teach them to respect the rights of others and they will have learned a lesson that will bring them reward in better associates and truer citizenship. Parents, it's up to you largely.

First Carriage Springs

Steel springs for carriages were introduced about 1700. The elliptic spring was invented in 1804 by Obadiah Elliott, a coachmaker of Lambeth, England.

ENTERTAIN FOR MISS SALLING

Many delightful affairs have been given for Miss Marian Salling whose marriage to Albert Ramsey of Lansing will take place in the near future.

On Thursday, Miss Salling was complimented with a tea and shower given by Mesdames Reagan and Mason at the home of Mrs. Reagan.

Miss Elaine Reagan welcomed the guests at the door and passed them on to be received by Mrs. Reagan, Miss Salling, Mrs. Salling and Mrs. Mason.

The house was fragrant with purple and white lilacs which formed the attractive decoration, the dining table being centered with them while lighted candles guarded them on each side. The hostesses were assisted by Mrs. Louis Harrison and Miss Lindstrom who poured and Mrs. Lorane Sparks and Mrs. Sigwald Hanson.

Miss Salling was showered with an array of beautiful gifts from the many friends in attendance.

Mrs. H. A. Bauman and Miss Bauman entertained on Saturday with a bridge luncheon and kitchen shower for the bride elect, Miss Salling, at their summer home at Lake Margrethe.

The luncheon was served at the dining hall and the tables were charming with graceful white poppies together with dainty bridal place cards and nut baskets.

Seven tables were filled for the game during the afternoon, the high scores being held by Mrs. Carl Mickelson, and Mrs. C. C. Wescott of Ypsilanti. A guest of honor prize was given Miss Salling and a draw prize to Miss Lucille Hanson. The kitchen shower which followed was made up of a complete line of kitchen equipment.

EARNING, SAVING AND SPENDING OF EQUAL IMPORTANCE IN PERSONAL PROGRESS

(By W. S. Straus, President American Society for Thrift.)

Andrew Carnegie, one of the world's greatest exponents of thrift, was once asked which he considered the most important, earning, saving or spending. He replied by asking which of the three legs of a stool was the most necessary.

It would be well if this understanding of thrift were widespread. The three factors in the process of acquiring and using money are interdependent and it is false doctrine to over-emphasize saving.

We see examples every day which tend to prove that quite a large percentage of the people give insufficient attention to spending or investing. There are opportunities on every hand for earning money and it is not difficult in these times and under present conditions for the average person to save something out of his income. But the amount of money which is lost through the unwise use of savings is now said to be greater than the annual growth in national savings deposits.

With the majority of people, the accumulations of savings is a slow process requiring great patience and persistence. The margin between income and the necessities of life is not wide. Hence it is all the more unfortunate that greater attention is not given to the problems involved in the proper use of savings.

The trouble very largely lies in the fact that people do not give sufficient study to these problems. Incidents are not uncommon where persons have parted with the savings of years on the representations of total strangers. Every saved dollar represents hard work and great patience. Just as much thought and care should be used in administering it as in acquiring and saving it. If this rule were applied by every one, there would be a tremendous elimination of lost or wasted money.

It is the part of good thrift to be as careful in letting go of your dollars as you were in getting hold of them.

What Culture Is

Using big words is not culture. Culture is a combination of intelligence, education, skill, kindness and modesty. —Aitchison Globe

Fritz Gives an Operation Banquet

Fritz, veteran of the A. M. F. and mascot of Victory Post No. 64 of the American Legion, of Los Angeles, gave a banquet the other day for his friends to celebrate his recovery from an operation to remove shrapnel from his body. He is seen here beside the dinner table, wearing his medals with Fontaine La Rue, who assisted him in entertaining his guests.

INFLUENCE

By THOMAS ABRAHAM CLARK
Dean of Men, University of Illinois.

MRS. WHARTON was talking to me about her son. He was an only child and scarcely ever been away from her care, a night in his life. His father had been dead ever since John was six, and it was to his mother's influence and direction that he owed the principles which actuated his life. He was just finishing high school now, and the question under consideration was his going to college. Should he stay at home and attend the local institution where he could continue to be under his mother's eye, or as he very much wanted to do, should he go to an eastern institution which some of his more intimate friends were attending? It was a question which it was very hard to decide and Mrs. Wharton was getting my opinion on the subject.

"I don't like to have him go away," she was explaining. "I should like to keep him under my influence for a little longer."

Mistaken mother! He would not go beyond her influence no matter how far he wandered. Influence of that sort is not dependent upon physical conditions. Sometimes distance and separation only tend to emphasize the strength of the influence which training and precept and example have had upon one.

My father held to very rigid principles of religious and moral conduct. The example which he set for me still has its potent influence upon my own procedure, though he has been dead more than fifty years. There were certain practices which in his eyes were objectionable but which in mine, with the different training I have received and the wider opportunity for observing manners and customs which I have had, seem quite unobjectionable, and yet I do not follow my judgment. I yield even today to the influence which my father had upon me long years ago.

A young newsboy has just come to the railway coach in which I am riding.

"Would you like a morning paper, sir?" he inquires. His voice is soft and pleasant; his manner is courteous, his hat is in his hand as he makes the inquiry. Some one has taught him good manners. His fourteen or fifteen years have been spent under the influence of a refined mother. I have no doubt, and it shows in the way he carries himself, in the intonation of his voice, in his quiet polite approach, and this same influence will be apparent twenty-five or thirty years hence in the way in which his own boy conducts himself.

It was the home influence which ten or a dozen years ago kept boys straight and clean and manly even though that influence had its inception four or five thousand miles away. There is a little poem by Fannie Well Boynton which expresses this power of influence not weakened by distance:

They marveled at the lad—
So young, so strong, so radiant of cheer,
That he, from his soft life, could grapple death,
Could sing, and laugh and with exult-
Could die—and know no fear.

They marveled, but guessed not
That far beyond the west horizon
Through long, still hours of sleepless holy nights,
Wrestling with God, up to the star-lit heights,
His mother prayed for him!
(© 1928, Western Newspaper Union)

MISS JOHNSON GIVEN SHOWER

Miss Mollie Johnson, a June bride, was guest of honor at a pre-nuptial luncheon and shower on Monday, the affair being given by Mrs. H. A. Bauman and Mrs. Oscar Hanson.

The luncheon tables had a lovely bridal appearance being graced with white flowers, white rose baskets and wedding bells for place cards.

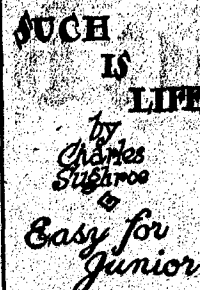

A miscellaneous shower followed which added many beautiful gifts to the bride's green chest.

Four of the guests were seated in chairs with lucky numbers and were given prizes.

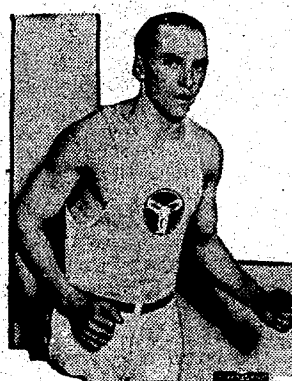

Curative Oil

Carron Oil is a mixture of equal parts of linseed oil and lime-water. It is employed as a dressing for burns and takes its name from the Carron Iron works in Scotland, where it was generally used.

AGRICULTURAL NOTES

Dairymen interested in the comparative profits obtained from purebred and grade dairy cows may get information on this subject in Circular 26-C, "Comparison of Purebred and Grade Dairy Cows." Write to the U. S. Department of Agriculture, Washington, D. C., for the circular.

It is often a mistake to cut small trees, says the Forest Service. Much of the wood goes into the slab and sawn piles, and what is taken makes only a small scale of lumber which is of low grade and low value. Young trees are growing rapidly and usually making the highest net money return to the landowner.

Success in the buying of feeder cattle and selling of fat cattle depends largely upon knowledge of the market conditions at various times of the year. A cattle feeder may have ability to produce large gains at low cost, but this alone does not necessarily mean good profits. A successful feeder should have some knowledge of the trends of the cattle market and should know that the demand for certain grades of cattle varies in different seasons. Medium and lower grades of cattle usually reach their high point before July, but well-finished steers of exceptionally good quality generally sell for higher prices in August than at the beginning of the summer.

Nitrogen is the most expensive fertilizer there is, but a crop of sweet clover when plowed under will add without cost a good supply of nitrogen taken from the air. Sweet clover forage is also high in protein, which is an expensive element in livestock feeds. A second season's growth of a biennial sweet clover may be grazed as pasture from early spring until the plants are too woody to be palatable, which is usually about the end of July. There is no other plant that will furnish as much grazing as a stand of sweet clover in its second season. This crop will grow almost anywhere, provided there is sufficient lime in the soil and enough rainfall.

Dairy utensils can be sterilized efficiently and at little cost in a galvanized iron box sterilizer where a steam boiler is not available. This sterilizer consists simply of a box with a tightly fitting lid, which can be made at reasonable cost by any tinsmith. The box is set on a gas or oil stove, or on a concrete, brick, or stone foundation to serve as a fire box. A little water is placed in the box and the utensils put on a slatted rack high enough to hold them out of the water. If enough heat is applied under the box to boil the water, steam will be generated and the temperature within the box will be raised high enough to kill practically all the bacteria.

Don't use good feed to produce lice eggs. Get marketable hens' eggs instead. The food the louse sucks from a hen is subtracted from the supply available for egg production. Look for body lice, for head lice, and for feather lice. You can kill any or all by dusting with sodium fluoride. A dozen "pinches" of powder on each grown fowl will do the business. The application of sodium fluoride by the "pinch method" or by dipping, the Department of Agriculture experimenters have found, is the best method known of combating poultry lice. None of the louse "medicines"

to be used in the drinking water will control the parasites. It is not so easy as that, but time spent in treating lousy fowls with sodium fluoride is profitable. All the fowls must be treated or the lice will soon spread from the infested to the clean fowls.

One of the most effective substances to prevent the house fly from breeding in manure heaps is "hellebore." During the summer months fly breeding goes on most actively and the farmer is often too busy at this season to haul manure away regularly. The best form in which to buy the hellebore for this purpose is as a powder. Add ½ pound to every 10 gallons of water, stir it, and then allow it to stand 24 hours before using. Ten gallons of the mixture should be applied to every 10 cubic feet of manure. This treatment will destroy all but a very small percentage of the fly larvae. The composition and rotting of the manure is not interfered with by the hellebore and there is apparently no injury to field crops fertilized with the treated manure.

The Dairy Bull
It is a comparatively simple matter to increase the production of dairy herds through the use of purebred bulls until the herd averages 300 pounds of butterfat a year per cow. As production increases from 300 to 400 pounds, it becomes more difficult to find bulls that are good enough to increase production. A study of 200 dairy bulls each having five or more daughters whose yearly milk and butterfat records could be compared with the yearly milk and butterfat records of their dams showed that of 9 bulls which were used in herds where the dams averaged yearly 200 pounds of butterfat or less, every one increased the production of the daughters over that of the dams of the daughters. Of the 49 bulls which were used in herds that averaged between 200 and 300 pounds of butterfat, 44 increased and 5 decreased production. Of the 85 bulls used in herds that averaged from 300 to 400 pounds of butterfat, 77 increased and 23 decreased production. Of the 57 bulls used in herds that averaged 400 pounds of butterfat or over, 28 increased and 29 decreased production.

Intractable Elephants
When you are contemplating the elephant at the circus or the zoological garden, the chances are that you are looking at an Indian animal, but the elephant is a much handsomer specimen and much more vicious. Not more than three have been taken out of Africa. They are practically intractable and while the Indian elephant may be tamed and tamed, this is not possible with the African.

Slaves Expert Workmen
During the slave period most of the South's skilled mechanical work was done by negro artisans. The fine old Southern mansions were the product of negro carpenters. Machine shops, gins, smithies and even the railroads were in a large measure manned by negro slaves. They were in such demand many were able to hire themselves out and thus purchase their freedom.

Whole wheat in wholesome form . . .

The whole wheat—all of it, and nothing else, is in **Shredded Wheat**. None of the healthful qualities, not even the bran is lost. And better still, the grain is steam-cooked, shredded, formed into large loaves and baked all the way through. This is not just to bring out the flavor. It insures easy digestion and enables grandfathers as well as grandfathers to secure the full benefit of nature's most important food.

Made by The Shredded Wheat Company

WHAT THE DEPARTMENT OF CONSERVATION IS DOING

Lansing, June 11.—The United States Forest Service has started the expansion of work on the establishment of national forests in Michigan. Government officials have come forward with an offer to purchase State-owned lands in certain parts of the State. The Department of Conservation at a recent meeting voted to accept the offer of the Federal authorities. It approved the sale of lands within the national forest units located in sections of Iosco, Alcona, Oscoda and Ogemaw Counties and other lands in Chippewa, Alger, Schoolcraft and Delta Counties. The first group is in the lower peninsula while the latter is above the Straits of Mackinaw.

Michigan will gain materially by this move. The government has promised to do exactly what the State is accomplishing and in addition will pay for the privilege. The Federal foresters will plant the land as well as provide adequate maintenance and fire protection during the ensuing years of growth. Federal men are already busy in Ogemaw County appraising the land.

Lansing, June 11.—Persons interested in learning about the State parks may gain valuable information by writing to the State Conservation Department, Parks Division, and requesting copies of the new maps which are now available. These maps show all the principal highways, the State Park locations, data relative to their suitability for fishing, etc. These maps are furnished free of charge.

Lansing, June 11.—Michigan has launched an intensive campaign that has for its goal the material expansion of State-owned forests. The Conservation Department has approved work on several projects that will be sizable links in the forest chain that the Wolverine state is welding.

In Oscoda County, the Commission ordered that a tract of 12,000 acres be brought under administration before next winter. This means the erection of headquarters buildings at once, the running of fire lines and the laying of groundwork for other protective measures so that planting may be started in 1928.

Planting of trees is to be started on a 9,000 acre tract in Presque Isle County this fall. It will be administered from the Big Lake Forest. Fire towers, telephone lines and fire lines will be installed this summer at a beginning cost that should not exceed \$3,500.

The so-called Island Lake Forest located in Kalkaska and Grand Traverse Counties, which was offered to the University of Michigan forestry department, but which was not accepted, is now to be considered an annex to the Big Lake Forest. Development will start immediately. Fire towers, telephone lines and fire lines will also be installed here at an approximate cost of \$4,750. Planting should get under way this fall.

Forestry development in the Upper Peninsula presents many difficult problems. This has been conceded for years. Problems not encountered anywhere else in the State are continually arising to hinder the work that the State is attempting to do in the way of reforestation. Despite this fact, the Department has ordered that the 70,000 acre tract in Luce County be reestablished as a State Forest, at least in part, and that installation of protective devices and planting be resumed wherever conditions permit.

Marcus Schaaf, the State's chief Forester, has been instructed to observe other large tracts of land in the Upper Peninsula and report where in his opinion reforestation may be started to advantage.

To keep pace with this expansion project, it has been found necessary to plan for nursery enlargements. This means the construction of a packing house, and a seed storage building. It is expected that these items will not exceed \$2,500 in cost.

The new offensive in the Forestry Division will tax the time of Forester Schaaf so the Conservation Commission has approved the engaging of a competent assistant.

Lansing, June 11.—Replacement of the Mason State Game Farm residence which was destroyed by fire this spring is to be undertaken by the State Department of Conservation. The loss of the house was a regrettable occurrence and the Department believes that the erection of a new building within the very near future is necessary. The building was a distinct asset on the property, being one of the features of interest of the Department's most interesting and important projects.

The esteem in which the farm is held by those living adjacent to it was evidenced in the petition that property owners in the vicinity presented to Director George Hogarth. Practically everyone in that section of the county signed their names to the petition which expressed regret over the burning of the property and the hope that it would be replaced and the farm continue to operate as in the past.

Lansing, June 11.—Feeling that it is the State's business to interest itself solely in the propagation and rearing of game species of birds, the State Department of Conservation has decided to dispose of all the show stock at the Mason Game Farm. In the past there have been pairs of peacocks and other birds at the farm whose value lies in their feathers. While they added a touch of color to the setting, it is the opinion that the farm is one of utility rather than a beauty spot and all attention should be confined to producing game birds.

Putting Off
Nothing is hard when you do it. A least it is rarely as hard as you think it will be. Procrastination throws a heavy shadow—a shadow which shuts out the light and makes every prospect gloomy. Tasks put off come back multiplied, intensifying that life is "nothing after another" and proceeding on that basis to get the thing done quickly clears up the shadows. Grow Patterson in the Mobile Register.

Expansion in Rocks
Rocks do not grow. However, some stones expand slightly with heat and do not contract to original size.

E. M. T. 1925 GUIDE RECEIVES APPLAUSE

Commendatory comments are being received by the East Michigan Tourist Association upon the 1928 Tourist Guide and Directory. The Guide contains 128 pages of interesting information besides an insert map of Michigan in color. One of the features of the book is the section containing maps of counties which subscribe to the association through the board of supervisors with write-ups on the counties.

Other information includes, brief write-ups of cities, towns, villages and lakes, with local information lists of Michigan birds, fish, trees, mammals, wild flowers, synopsis of motor laws; East Michigan road logs; railroad, bus and steamboat time tables; digest of Michigan fishing laws; list of Michigan state parks, etc.

The guide is probably the most complete book of its kind ever issued in Michigan.

Rubicon, as It Were

The school teacher had asked for an instance showing how the physical features of the country had affected our development or history. One bright lad offered the following: "If it hadn't been for the Delaware river, Washington couldn't have crossed it." —Boston Transcript.

Jess Sweetser Coming Back

Apparently recovered from the illness that struck him after he had won the British Amateur championship in 1926, Jess Sweetser plans a comeback campaign this year that he hopes will lead him to another national amateur golf title. He has mapped out a program that will bring him into three tournaments this summer with the national amateur as his chief objective.

Indians Take on Ward

Cleveland will have a place for Aaron Ward this year even though this place is on the bench. He's a valuable kind of player to have around, opines Manager Peckinpaugh, and Peck teamed with him last year on the White Sox and should know. Aaron has been fitting himself for regular duty in the infield in case there is an early season vacancy.

Spike Webb Again Coaches

The photograph shows the veteran Spike Webb, coach of the naval academy boxing team, who has once more been given the assignment as coach for the American Olympic boxing team. Webb coached the boxers who went to Antwerp in 1920 and at Paris in 1924. Both teams ran off with major honors.

Raymonde Allain

Miss Raymonde Allain, who was chosen as the prettiest girl in all France to represent her country at the International Pageant of Pulchritude at Galveston, Texas.

DURANT

BREAKS ALL RECORDS FOR THE PAST FIVE YEARS

In May, Durant Plants shipped 18,125 cars, exceeding April by 15.4% and the best previous record since 1923 by over 29%.

This is no chance occurrence—it is a result of consistent gains begun last Fall, when the main plant at Elizabeth, New Jersey, broke all records for September, October and November.

March, April and May have exceeded the best previous three months' total for all time at the Elizabeth Plant by 57%.

At the close of business of each of these months there have been more unfilled orders on hand than ever before in the company's history. Even with this record-breaking May production the same condition holds true.

THIS BRILLIANT SUCCESS IS UNIVERSAL

In California*

One of the world's most critical buying markets, the Durant line was FIRST to tie for first place in 72 cities and towns in the month of April; SECOND to tie for second place in 47 cities and towns.

In All States*

Durant showed a gain of 19% for the first three months of 1928 over the corresponding period of 1927 in spite of the lost time due to getting new models into dealer's hands after January 1st.

In Foreign Countries

April broke all previous export sales records, and shipments for the first four months of 1928 showed an increase of 30% over the same four months period of any other year.

Now, May 1928, has surpassed May 1927 by 300%.

*April state registrations are the latest available.

There certainly must be a reason for this continued expression of universal public confidence and approval for Durant Products—Fours, Sixes and Trucks—\$595 to \$1550, f. o. b. Lansing, Mich.

There is an eager purchaser waiting for every Durant car. Have you driven one?

Corwin Auto Sales

MIDLAND'S GARDENS BRING VISITORS

(By E. M. T. Service)

Midland, county seat of Midland county, has several distinctions. The paramount one, probably, as a lure for tourists is its unique courthouse. Another one which is doing much to advertise Midland is its reputation as a city of beautiful gardens. These gardens are another example, according to the East Michigan Tourist Association, of the fact that East Michigan cities, towns and villages are never in competition with each other with respect to attracting the tourist. The attributes of each are distinct and separate.

Midland's gardens are attributable to the initiative of H. H. Dow, head of the Dow Chemical plant. For years he has sponsored garden contests. This year he hired a landscape artist in Detroit and placed his services at the disposal of the residents.

Mr. Dow has on his estate beautiful gardens which attract thousands of visitors annually. The 70-acre garden tract is open to visitors twice weekly, and guides are provided to escort the visitors on these occasions.

DIPPING INTO SCIENCE

Diamonds Will Burn

As most of us think of the element called carbon it is hard to believe that diamonds are formed of it. This is true and if a diamond is heated to a very high temperature in a place that is air tight it turns to charcoal but if air gets to it, it will burn and form carbon dioxide. (© 1928, Western Newspaper Union.)

BIDS FOR CONSTRUCTION

Office of the United States Property & Disbursing Officer for Michigan, Lansing, Mich. Sealed bids in triplicate will be received here until 12 m.

June 21, 1928, and then opened for installation of water and sewer systems and sewage disposal plant, and construction of machine shop, ordinance shop, steel forage warehouse, bakery building, radio building, three kitchen and mess buildings, three bath and latrine buildings, and fifty tent floors; all at Camp Grayling, Mich. Further information on application.

BIDS WANTED

For furnishing and delivering coal in Court House and Jail Building for Crawford County at Grayling, Michigan.

Sealed proposals will be received by the County Clerk of Crawford County, Grayling, Michigan up to 1:00 p. m. Central Standard time of the 25th day of June, 1928 for furnishing and delivering approximately 80 tons of coal in the basement of the Court House and Jail Building at Grayling, Michigan.

All proposals must be submitted in sealed, plain envelope marked "Proposal for Furnishing Coal."

Bids will be opened publicly at the Court House in said Village at the session of the Board of Supervisors beginning June 25th, 1928. Bidders should state unit price per ton delivered in basement of Court House and Jail Building; also length of time said bid is good and approximate time of delivery.

Bidders should state size, kind and quality of coal.

The right to accept any bids or to reject any or all bids is reserved by the County.

CHARLES GERKE, County Clerk.

ORDER ISSUED BY AUTHORITY OF ACT 230, PUBLIC ACTS OF 1925, MAKING A CLOSED SEASON ON HUNGARIAN PARTRIDGES IN THE STATE FOR A PERIOD OF THREE YEARS

State of Michigan) ss.
County of Ingham)

The Director of Conservation, having made a thorough investigation of conditions relative to the planting of Hungarian partridges in the State recommends certain regulations.

Therefore, the Conservation Commission, by authority of Act 230, P. A. 1925, hereby orders that for a period of three years it shall be unlawful to hunt, take, or kill, or attempt to hunt, take, or kill, or have in possession any Hungarian partridges under penalties provided by Section 5 of Act 230, P. A. 1925.

Signed, sealed, and ordered published this tenth day of May, 1928.

GEORGE R. HOGARTH, Director Department of Conservation.

Conservation Commission by: Howard B. Bloomer, Chairman. Ray E. Cotton, Secretary. 5-81-8

DEPARTMENT OF CONSERVATION

For the State of Michigan

Lansing, Michigan, June 1, 1928.

NOTICE IS HEREBY GIVEN,

That the following described abandoned tax lands, situate in the County of Crawford, deeded to the State of Michigan by the Auditor General thereof under provisions of Section 127 of Act 206 of the Public Acts of 1893, and acts amendatory thereof, have been withdrawn from entry under the homestead rights by the Director of Conservation and the Auditor General, acting jointly under authority conferred by Act 141 of the Public Acts of 1901, amended, examined and appraised and will be placed in market by offering them for sale at a Public Offering to be held at the Court House in the Village of Grayling, on Wednesday, the Eleventh (11th) day of July A. D. 1928, at nine o'clock Central Standard time in the forenoon at which time they will become subject to purchase in the manner prescribed by law.

In the event of a sale the deed or deeds by which the lands will be conveyed to purchasers will contain a clause reserving to the State of Michigan all rights in any mineral, coal, oil or gas found lying, or being on, within or under said lands; and also reserving to the People of the State of Michigan the rights of ingress and egress over and across any of said lands lying along any watercourse or stream, as required by Section 12 of Act 280 of the Public Acts of 1900 amended. (Sec. 456 C. L. 1915.)

Interesting Events In Grayling 23 Years Ago

INTERESTING ITEMS OF NEWS GATHERED FROM THE FILES OF THE AVANCE OF 23 YEARS AGO.

Thursday, June 15, 1912

Mrs. Dr. Woodworth was visiting in Lewiston last week.

Rolla Brink and family leave today for a two weeks vacation at the old home in Bayport.

P. M. Hoyt attended the Flint jubilee last week and is visiting with his old friends in that section of the state.

Fred Michelson is enjoying a visit with his friend and room mate at the Ferris Institute, Mr. Davis of Pontiac.

Miss Anna Olson started last week for a summer visit in Wisconsin, Dakota, and Colorado. She will be in the home and by her associates here.

Married—At the home of the bride's parents, near Pere Cheney, Sunday, June 11, Mr. Charles A. Smith to Miss Pocahontas B. Penn, Rev. L. Stevens officiating.

Mrs. S. J. Mortensen went to Saginaw a week, for a visit with her daughter, Mrs. A. Alderton and a new granddaughter that arrived there a few days ago.

P. McMillan of Gladwin, has rented the Woodworth store of M. A. Bates and will install a needed addition to our village in the form of a first class restaurant, bakery and confectionery store.

The Dry Goods side of the "Pioneer Store" of Salling, Hanson & Co., has been fitted with new shelving, counters and drawers, which are as fine as any store furniture in the state of Michigan.

Walmer Jorgenson returned Saturday from a flying business trip to Tennessee, where he found them cutting wheat and corn knee high. He saw a strip of nice country, but yet thinks Crawford county is all right.

It is said that the Detroit & Charlevoix railroad, which runs from Frederic to South Arm, will soon pass into the hands of the Michigan Central, giving that system a more direct line to the summer resorts in that portion of the state. A number of the officials of the Michigan Central were over the road last week.

The ball game last Saturday between Grayling and Detroit was the best played here this season. Detroit won by a score of 6 to 2, which under the circumstances was a very satisfactory showing for Grayling. The new Grayling pitcher did good work and the management believe that by the time the new grounds are ready and the boys settle down to fit into each other, the Grayling club will make a first-class showing.

Henry Bates of Maple Forest is bound to be progressive. He has put on his farm the first modern weather in the county.

The local lodge of Odd Fellows, in connection with the brethren at Lewiston, chartered a special train last Saturday evening and went up to Jo-

hannesburg to institute a lodge at that place. Some seventy members from Grayling and nearly as many from Lewiston made the trip. The Citizens' band went along and furnished the music.

WOODBURN-BECKER

The marriage of Eva Woodburn and Axel Becker was solemnized yesterday morning at the home of Mr. and Mrs. James Woodburn, parents of the bride, Rev. A. P. W. Becker officiating.

The bride was lovely in white Muslin-De-Soie and bridal veil, with shower bouquet of white roses. She was attended by her sister, Miss Bertha, robed in pink Muslin-De-Soie with carnations.

Dr. Sigurd Becker, of Detroit, as best man, guarded the blushing groom.

The rooms were finely decorated with Snowballs and Smilax, and the wedding window with flowers and palms.

The ceremony was preceded by Mendelssohn's wedding march by Miss Gladys Hadley, pianist, and a vocal solo by Miss Florence Tromble, and as the words were spoken which made the twin one, an appropriate solo was beautifully rendered by Miss Clara Toepel of Detroit.

Mrs. Becker has been a resident here most of her life, and has a host of friends who unite in wishing them all of joy and prosperity. Mr. Becker has been employed in the bank of Grayling since it started, and is recognized as one of our rising young business men who is entitled to success. Congratulations and a wedding breakfast occupied the time till they were escorted to the train enroute to Mackinaw Island from whence they will go to Detroit and will spend some time at the summer resorts in that part of the state. Among the out of town guests were Irving Everett, of Cheboygan; Miss Grace Hagadorn, of Bay City and Miss Clara Toepel of Detroit.

DIPPING INTO SCIENCE

Millions of Insects

There are between five and ten million species of insects in the world. Many of these are very necessary to us. Some help in destroying the harmful insects, others give us valuable medicine, and others still more useful carry the pollen from plant to plant, enabling them to bear their fruit and flowers.

(© 1935, Western Newspaper Union)

When Does a Man Stop Loving?

Dr. Will C. Durant, author of "The Story of Philosophy" has stated that a man past thirty is incapable of love.

This statement threatens to break up innumerable happy households, and has brought forth a storm of criticism and argument throughout the country.

A galaxy of literary, dramatic and artistic stars answer his statement.

Read what Ring Lardner, H. L. Mencken, George Ade, Fannie Hurst, and many others, have to say on the subject.

We Publish a Series of Shrewd, Amusing, Witting Answers to Mr. Durant's Amazing Proclamation.

Here's a Chance to Find Out What Your Favorite Writers and Actresses Think About LOVE!

Read the Series in The Avalanche beginning this week

Is THIRTY the Love Deadline?

Will Durant was born in North Adams, Mass., in 1865, and was educated in the Catholic faith by the Jesuits, receiving from them a degree of B. A. in 1907. After a period of newspaper work as a reporter for the New York Evening Journal, he became a professor of Latin, Greek, and French at Seton Hall. For the next ten years he devoted himself exclusively to scholarly pursuits, which included a trip to Europe and extensive study at Columbia in 1917. "The Story of Philosophy," written several years ago, has now totaled 200,000 sales and the publishers figure that at least 1,000,000 people have read it. At the present time not engaged in lecturing through the country, Doctor Durant lives in New York City and writes for the magazines. He is married.

By WILL DURANT

And now what if I never said it at all? What if this report of my denying the possibility of love after thirty, is as fictitious as the famous philosophical remark that all men should shoot themselves at thirty-five? Slowly I am learning my lesson: I must never joke with reporters, they will quote me without the smile, and they will be certain to ignore modifications.

But it would be a shame, now that this learned discussion has gone so far, to say that the commotion has a purely imaginary source. Perhaps the best thing to do in the premises is to set down what really was said (with sundry improvements that come as afterthoughts), and to indicate what basic problems lie at the root of our rather frivolous debate.

The original query was intelligent and fundamental. Can we restore the old moral code? It is a good question because it suggests the possibility that the old code is permanently gone, and that our current "immorality" is but a groping trial-and-error transition to a new code of honor and decency.

For the old code was developed with an agricultural society in view; it assumed a brief adolescence, and a rapid arrival of the adult at economic self-sufficiency; it assumed that marriage would come early, and that children would come early and often. On the farm it was cheaper to marry; the wife was an asset, not an ornament; the children soon earned their keep, and became profitable investments of one's energy; therefore marriage came young, motherhood was sacred, and birth-control was immoral.

And in the complex industrial life of the city men attain self-sufficiency late, and in the middle class latest of all; a wife is so expensive a luxury that only the poor can afford to marry; children are frowned upon by landlords, and cannot earn money for us till they are fourteen or sixteen; immigration, and the suction of the city upon the country, replenish the population very well; the streets are so littered with children that they interfere with our eight-cylinder Juggernauts; there is no evident necessity of adding to their multitude.

Above all, the advance of medicine, sanitation and parental care has reduced the death rate to a fraction of what it was; the birth rate had to come down, or else Ecclesiastes and Malthus would have been right in believing that when goods are increased, they are increased that consume them, and the last condition is as bad as the first. So the commandment to breed and multiply loses its urgency in the city; marriage comes late, and

children are an oversight or love. Social necessity, which makes all sound morality no longer requires large families; early marriage is not indispensable for the maintenance of the race, and birth control, which the tired and virtuous Tolstoy condemned as a great sin, is taken up by the wisest ladies in the land. All things change.

Consequently there is no necessary permanence, nor any inherent holiness, in the moral code which came down to us with our religion and our politics. "Immorality" is mostly other people's morals, or the morals of other days. As the industrial revolution altered our lives, destroyed our homes, packed us into apartment boxes, replaced the family with the individual and the state, subjected religion to science, and art to industry, so it is rapidly dissolving the moral code developed in and for an agricultural age. Invention, which is the mother of progress, is transiently the nurse and instrument of our "immorality." Adolescence lengthens, and maturity of mind and character, like maturity of means, comes nearer thirty than twenty. A man of thirty is young now, in body and soul; woman, who in the past was old, decrepit and trustworthy at forty, now retains her beauty into the "dangerous age"; and if Balzac were alive he would write with admiration of la femme de quarante ans—the woman of forty years.

Perhaps in the end, sexual development will also be delayed; and then a new adjustment of nature and industry may come, with later puberty, a longer period of growth and education, later marriage, later climacteric, and a lengthened life. When that new adjustment comes, man will be on a higher level of health, power and thought than ever before. The prolongation of adolescence lifted man from brutality to civilization; which of us can tell the fruits of that further prolongation of adolescence which goes on today under our very eyes?

Is Bulwer's "Coming Race" about to arrive?

Meanwhile, however, the interlude is chaos. Many of our people are of south-European origin, and will carry with them, for several generations, a racial habit of sexual precocity. The city will continue to stimulate desire, and to discourage marriage; everything will hinge upon that. Promiscuity will increase, and women will achieve the "single standard"—by imitating that of men. Men will have many loves, and live through them; and then, at thirty or so, they may marry. An increasing number of them will never marry at all.

Here at last we touch our original question: can marriage, postponed until thirty, be ever a real love-marriage, ever anything more than a "marriage de convenance," with the banker playing the role of the father? Can a man love at thirty? Dear of desire; there is no age that is safe from infatuation, and Goethe at seventy could propose to a girl of sixteen. But could he have fallen at her feet in adoration? Could he have surrendered to her his Olympian egotism, and lost all thought of self in devotion to her? Could his love be no mere itching of the flesh, but a hunger and thirst to do services to the loved one, to be near her and feel the warmth of her presence and her comradeship?

Perhaps this full flush of love, more spirit than body, more devotion than desire, comes only to the young; and middle age seldom knows it except for one who has been loved from early years through all the fluctuations of desire and through all the vicissitudes of fortune. (Our question is not whether love dies at thirty, but only whether love in its full flower can come to a man of thirty for a woman whom he has not loved before.) It is a pity that when such complete love comes it is not permitted, in our cautious days, to weld the lovers into a marriage that shall be a vow burned in with the unstinted emotion of youth, rather than a physiological partnership entered upon with the cold rationality of middle age, under the inspiring supervision of an elderman.

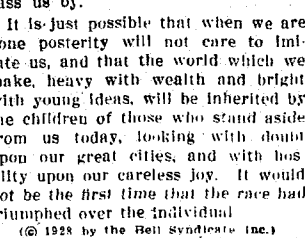

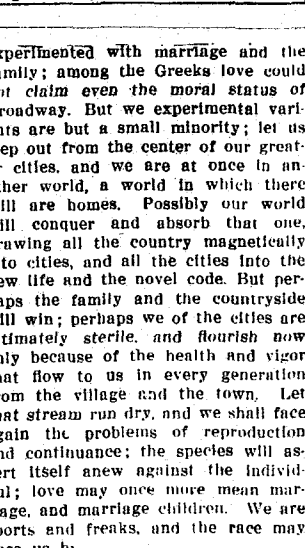

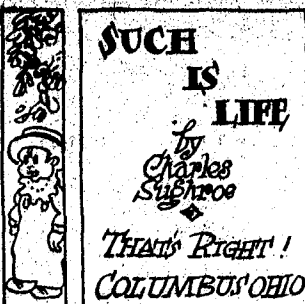

The tragedy remains, in this melting time, that we love profoundly and fruitlessly, and do not marry; that later we love again, less profoundly and intensely, and do not marry (the banker still frowning upon it); and that later we love once more, very moderately and reasonably, with an eye on the ledger and marry. How can a man feel all the delightful sentimentality of love after ten years of adventures in erotica? We are then, in Balzac's phrase, gorillas trying to play on a violin.

It is true that youth is not wise enough to make vows forever, that love-marriages, like other marriages, fall upon many rocks, but who has proved that middle age, in these matters, is wiser than youth? Youth is never so foolish in adoration as middle age is in desire. And what if love must end, never having been dowered by nature or instinct with an easy permanence; is it not better to know it in its divine completeness, to open every door of the soul to it when it comes? The pessimist broods over the brevity of all good things; the optimist resolves to enjoy them while they last.

The last word should be one of philosophy: there is always a slight possibility that we are wrong, and that time will smile at—or ignore—our analysis. Who knows but that our generosity of necks and knees, our replacement of professional with amateur promiscuity, our reduction of women to appetizers and desserts, short-term investments, and show windows of our male prosperity, may be but an interlude between two ages of control?

As one mingles for a stilled moment in Broadway's big parade, and observes the riotous emancipation of an instinct once subservient to production and the race, the triumph of liberalism leaps to the eye and the mind; and one wonders if this moderation, too, like bitter Puritanism, may not bring a reaction that will swing us back helplessly to an extreme of suppression and restraint?

Many times in the past, men have

experimented with marriage and the family; among the Greeks love could not claim even the moral status of Broadway. But we experimental variants are but a small minority; let us step out from the center of our greater cities, and we are at once in another world, a world in which there still are homes. Possibly our world will conquer and absorb that one, drawing all the country magnetically into cities, and all the cities into the new life and the novel code. But perhaps the family and the countryside will win; perhaps we of the cities are ultimately sterile, and flourish now only because of the health and vigor that flow to us in every generation from the village and the town. Let that stream run dry, and we shall face again the problems of reproduction and continuance; the species will assert itself anew against the individual; love may once more mean marriage, and marriage children. We are sports and freaks, and the race may pass us by.

THE WEEK IN WASHINGTON

(By Congressman Roy O. Woodruff.)

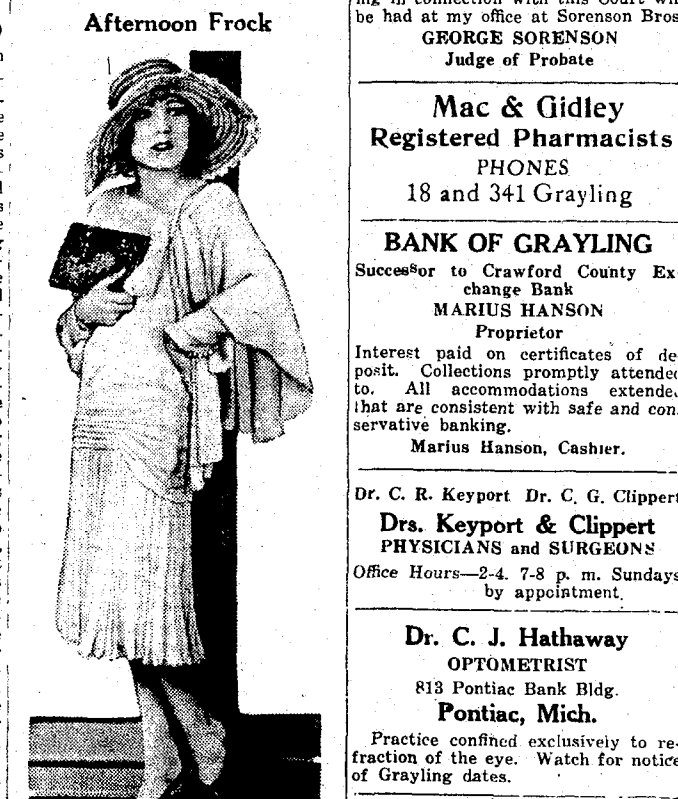

In the absence from Washington of Members of Congress since adjournment, the House and Senate Office Buildings have taken on a more or less abandoned look, with the doors of the offices closed and notices appearing thereon that the Representative has gone home. The Capitol Building is thronged with sightseers all day, however, as it seems to be the pivotal attraction to those coming to Washington. The Executive Departments of the Government are running full blast as usual, and will continue to do so as long as appropriations are forthcoming from Congress. The Legislative branch of the Government passes the laws, appropriates the money, and then the Members of Congress go home to get the contact with the people that is so necessary for guidance in charting the course for the next session. The Executive Departments adopt regulations for administering the laws that Congress enacts, spend the money appropriated, and get ready to ask for more. The Judicial Branch, as represented by the Supreme Court which sits in Washington in what was formerly the Senate Chamber in the Capitol, recessed June 5th until October 1st, and the Justices have for the most part left the city for their summer homes or to travel. The intense strain they are under while in session, the long hours they observe to hear the important cases far reaching in their effect upon the economic life of the nation, leaves no room for doubt that they have earned the vacation they are entering upon.

I keep my Washington Office open all the year around for the accommodation of constituents who have matters to transact through me with any branch of the government, although I shall return to Michigan shortly after July 1st to remain in the district until the reconvening of the short session of Congress in December.

I hesitate to make any prophecies regarding the outcome of the National Conventions, which are now taking up so much space in the newspapers of the country, because it is idle to speculate about an unknown quantity. Personally, I have been strong for Secretary Hoover ever since he announced that he would be a candidate, believe him to have all the qualities an aspirant for the Presidency should have. His talent for developing natural resources and applying fundamental principles of engineering to all problems as illustrated in his career as a mining engineer and as head of the great Department of Commerce, convinces me that he would bring to the White House an ability as a constructionist that would insure the country having an era of continued prosperity and progress that would extend to every element of our population. He is a quiet and unassuming man. He has no visible trace of egotism in his makeup, nor does he impress one as wanting to impose his will upon others regardless of differences of opinion that exist. He was a guest at a dinner I attended a few weeks ago given by Senator Vandenberg of Michigan to Senator William Alden Smith, at which the members of the Michigan Delegation in Congress were present. Mr. Hoover and his charming wife captivated us with their unassuming ways and friendly presence. In my official contacts with Mr. Hoover and his Department, the integrity of purpose which he has always displayed commended him to me and caused me to conclude that his candidacy should appeal to all men of progressive thought. Senator Borah, a progres-

Afternoon Frock

The cape theme, which strikes such an important note in this season's smartest fashions, is used to achieve a graceful effect in this charming afternoon frock of water-blue chiffon worn by Renee Adoree.

Note how gracefully the cape is employed, so that a novel one-sided effect is achieved through the cape falling over only one arm in rippling fashion. The diagonal neckline, seen on so many of today's smartest frocks, accentuates the one-sided effect of the frock. Note, too, the large soft bow attached with a rhinestone pin at the neckline.

The skirt is box plaited and the blouse is shirred in front to affect the fashionable tight girle line across the hips.

A large picture hat adds a further summery tone to the costume.

'Spouse You Try It

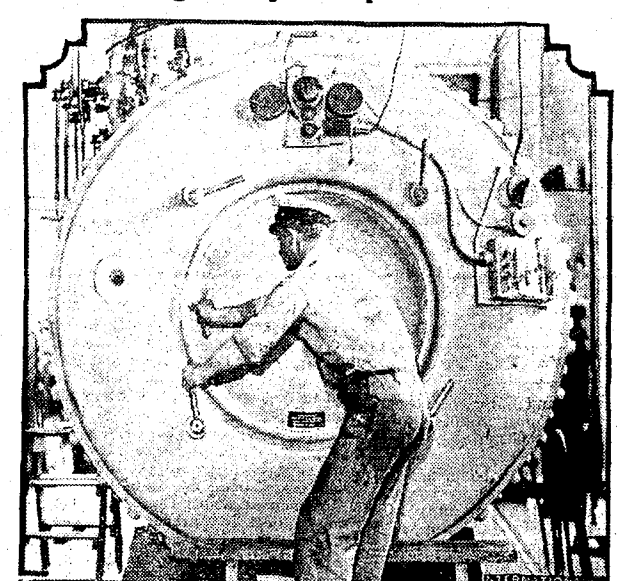

What is half of twelve? Why any child of four can answer that. Six, of course. A bright young correspondent, by using Roman numerals, asserts that the answer is seven, that half of 12 is 7 and this is how he gets that way: XII is 12, he says. Now draw a horizontal line cutting XII exactly in half and you get VII, which is 7, he says. Now, what do you know about that?—Pall River Herald-News

Human Engine Needs Sugar

Sugar is the quickest, cheapest, purest and most generally efficient fuel for the human body. It begins to burn within about five minutes after it has been consumed. That is why it is so valuable in the diet of those who do heavy physical work. James A. Tohey explains in Hygienic Magazine.

Training Navy Deep Sea Divers

At the navy yard in Washington a school has been opened for the training of naval deep-sea divers who are called on to aid in rescue work when submarines meet with accidents. This photograph shows one of the compression tanks used in treating divers afflicted with "bends."

Food for the Hungry Striking Miners

Miss Lillian Pickeral of Washington is shown standing in a truck, helping a group of Pennsylvania striking miners load a truck with foodstuffs collected in Washington to be taken to the strike districts where the families of many of the miners are almost starving.

NEW TYPE AMPHIBIAN PLANES

According to a bulletin from the U. S. Navy Recruiting Station at Detroit, the Navy Department has awarded a contract for twenty new-type amphibian planes. The total cost involved is \$503,000 which is quite a sum to keep the "eyes" of the fleet up to standard. The new planes will be equipped with Wasp air-cooled motors of 425 horsepower. They will carry a useful load of 1500 pounds including fuel, radio, machine guns and bombs. The wing spread is 45 feet and the total weight is 3249 pounds. The crew consists of three men, namely, two pilots and one observer. All men enlisting in the Navy at the present time are given a chance to qualify for Aviation duty.

Local News

THURSDAY, JUNE 14, 1928

20 per cent off on all Iron Clad silk hose at Olson's.

Roy Brown was home from Bay City over Sunday.

Grayling Creamery butter—better than ever. Ask your for it.

Hans L. Peterson visited Mrs. Peterson at University Hospital, Ann Arbor over the week end.

Men's work oxfords for \$3.00 at Olson's.

Mr. and Mrs. Spencer Melstrop and children, Elizabeth Ann and Junior, of Detroit visited at the Salling home over the week end.

Mr. and Mrs. Malcolm W. McLeod returned Wednesday from Mt. Clemens, where they had been visiting their daughter, Mrs. Howard Brandt.

We have just installed the new Borden Malted Milk Dispenser. This assures a uniform drink and also saves the service. Try a Borden's Malted Milk and be convinced.

Dr. and Mrs. C. C. Westcott of Ypsilanti were visitors over the week end at the home of Mrs. Westcott's mother, Mrs. J. K. Hanson, and of other relatives.

Karl M. Whitney, Bentley Klingensmith, John Brewster and Gordon Mead of the Whitney-Schram orchestra visited in Owosso the first of the week returning Wednesday.

To show their appreciation of the first and second boys basketball teams who won the district championship this year, the Athletic Association have presented each member with a pretty watch fob. The boys are certainly deserving of being so remembered and it is most thoughtful of the Association to show their regard for the boys.

Mrs. Andrew Brown left Saturday to visit relatives in Flint and Columbia.

There will be a special meeting of Grayling Chapter O. E. S. No. 83 on Friday evening, June 15.

We have a complete line of Jung and Scholl's arch supports and braces Olson's.

Buy Coty's Face Powder and get a large sample of Coty's perfume free at Central Drug Store.

Mr. and Mrs. Burt Scholz of Saginaw visited over Sunday at the home of the latter's parents, Mr. and Mrs. P. L. Brown.

Mrs. Henry Trudo of Caro is visiting her parents, Mr. and Mrs. P. L. Brown. Mr. Trudo drove up and spent Sunday here.

Mrs. Cletus St. Pierre and daughter Donna of Niles, Mich., are here visiting her father, T. Sancier and also her many friends.

Mrs. Peter Larson is visiting her daughter Mrs. Albert Schroeder and husband in Detroit, expecting to remain for about a month.

Dr. and Mrs. C. G. Clippert spent the week end visiting the latter's parents, Mr. and Mrs. E. H. Webb, who reside near Mt. Pleasant.

Rev. Fr. J. L. Culligan and Walter J. Nadeau are spending the week at Beaver Lake in the Upper Peninsula, enjoying an outing and fishing trip. The latter is taking a two weeks vacation from his duties as night operator for the Western Union.

C. O. McCullough has moved his shoe shop from next to the Legion hall to the Goudrow building on Michigan avenue that he recently purchased. Charlie said that he didn't intend to let the A. & P. store and others get anything on him so he too joined the movers. He didn't say whether it was to save rent or just because he wanted a change.

Plants for Your Garden

Our extensive stock of blooming and foliage plants suggest many attractive combinations for your flower gardens. Priced so low that you may purchase all you need at little cost.

Let us fill your porch boxes.

Henry Ahman is home from the University of Michigan, Ann Arbor, for the summer vacation.

Don't forget that we carry Pled Piper shoes for children, there is nothing better. Olson's.

Mrs. Frank Woodruff, who was here visiting her daughter, Mrs. Clarence Brown returned Sunday to Bay City.

Miss Vera Matson of Detroit is spending the week here visiting her parents, Mr. and Mrs. Erner Matson and friends.

Saddle horses for men, women and children at the Grayling Riding stables, opposite Model Bakery. Central Drug Store.

Mrs. Holger Hanson is in Burt, Mich., where she went to attend the funeral of a relative.

David LaMotte, who has been in Detroit doctoring is expected to return home tomorrow.

Mr. and Mrs. Frank Green and son Rex of Hudson arrived Wednesday to spend the week camping on the Manitowish river.

Otto Mahneke, who has cooked in the Salling Hanson Co. camps for many years has been hired as caretaker at the "Pines."

Next Saturday, June 16, will be Grange Memorial day. It will be an open meeting and anyone wishing to meet with them is cordially welcome.

Leave your order for milk to be delivered at Lake Margrethe at the Grayling Creamery, phone 913. We make delivery at 6:00 a.m.

Mrs. Signa Rasmussen, accompanied by the Messrs Poul Jensen and Ole Wium of Detroit visited at the home of her parents, Mr. and Mrs. Jens Ellerson over Sunday.

Mr. and Mrs. Ora Ingalls of Flint are the proud parents of a daughter Betty June born at the home of the former's parents, Mr. and Mrs. Clarence Ingalls, Sunday, June 10.

Eberson Olson, Louis Herbinson of this city, Robert Lamont of Bay City and Wm. Wilkes of Mackinaw enjoyed a fishing trip on one of the lakes at the Canadian Soo over Sunday. All got the limit.

Golf enthusiasts will be glad to know that they will soon be able to purchase Walter Hagen Golf equipment at the Central Drug store, as they are to handle this line.

Mr. and Mrs. Peter McNeven and family are enjoying a visit from Mrs. P. D. Russell and her daughter Mrs. Arley Murphy and little son Russell from Emporia, Kansas. Mrs. Russell and Mrs. McNeven are sisters.

Several auto loads of friends drove out to the home of Mr. and Mrs. John LaMotte, located 7 miles south of Grayling on U. S. 27, Saturday night to help Mrs. LaMotte celebrate her birthday. She was agreeably surprised.

Misses Margrethe and Ella Hanson arrived home last Thursday from Bennett School, Millbrook, N. Y. for the summer vacation, accompanying their mother home, the latter who had been at Millbrook to attend the graduation exercises.

Mrs. Harrison Cameron and son Meredith of Detroit arrived Friday and are visiting old friends here, the latter enjoying meeting his old school mates. The family moved to Detroit from Grayling a few years ago. They are guests at the home of Mr. and Mrs. S. D. Dunham.

The store building vacated by the H. Petersen grocery is receiving a lot of interior painting and redecorating and the Kraus Estate hardware is being moved into it. This will be known as the Grayling Hardware. The old Kraus hardware store is being somewhat changed. The front windows are being lowered to give better display space.

Neighbors and friends of Mrs. Harvey Wheeler tendered her a farewell party Saturday evening, as the family expect to leave shortly after school closes for Pontiac, where Mr. Wheeler has been employed for several months. Three tables of cards were enjoyed and the guest of honor was presented with a lovely gift. A pot luck lunch was served late in the evening.

I have opened a fruit and vegetable store in the Burton Hotel building, where you may buy fresh fruits and vegetables at and lower prices than you can buy elsewhere. I have been coming to Grayling the past three years trucking fruits and vegetables and so am not a stranger here. Everything strictly fresh and in first class condition. Give us a call. Oscar Robarge.

Hans Petersen closed his place of business on Michigan avenue Saturday night and started at once to moving into his new quarters on Cedar street, one block north of Main street, recently vacated by the A. & P. Co. On Monday morning his new store was serving its customers in the usual manner. The stock is now pretty well settled and Mr. Petersen says his old customers are finding him just as easily as they did on Main street. Same reliable service and same high quality of goods will be the principle of the store he says. The phone number remains the same—No. 25.

See the women's and children's new slippers that just arrived at Olson's.

Mrs. Harold Millard and children of Flint are visiting her parents, Mr. and Mrs. Simon Sivral.

Don't forget that we carry Daniel Green Comfy slippers at Olson's.

The Board of Review of the Township of Grayling met at the town hall Monday and Tuesday for their annual session.

Have you tried our potato bread? It comes in round loaves and is finding great favor. Get a loaf the next time you want bread. Model Bakery.

Mr. Gunther of Cheboygan is assisting in the Western Union telegraph office during the absence of W. J. Nadeau.

O. P. Schumann left for East Lansing this morning to bring back their daughter Miss Helen, who is coming home from M. S. C. for her summer vacation.

The A. & P. store and the H. Petersen and Conline groceries sell Grayling Creamery butter. Ask for Grayling brand when you buy butter. Grayling Creamery.

We have started our milk route at Lake Margrethe for the season, and anyone wanting milk delivered there will please leave their orders at Grayling Creamery. Phone 913.

Pipes are being laid in the vicinity of Park street, north of Ionia street so the restaurant in that part of the Village will soon be afforded the use of city water.

Very beautiful invitations have been received by old Grayling friends of Rev. Fr. John J. Riese, to attend his Silver Jubilee, which he will celebrate on June 24th in Grand Rapids.

A. L. Roberts is enjoying a two weeks vacation from his duties as head foreman at the Kerry & Hanson Co. plant. He is spending the time at Houghton Lake, where he is erecting a new cottage.

Eberson Hanson Jr. arrived home Tuesday from St. John's Military Academy, Delafield, Wis., for the summer vacation. He was accompanied by his parents, who had gone there to attend the graduation exercises.

Mr. and Mrs. Walter Doroh and daughter June are enjoying a visit in Lansing. They returned with Mr. and Mrs. Claude Parker, who had spent Sunday here visiting relatives. Mrs. Parker and Mrs. Doroh are sisters.

Mr. and Mrs. George Cowell of the Soo are in the city called here by the serious condition of the former's mother, Mrs. Mary A. Turner. Mrs. Turner, who has been ill for some time, is reported as resting a little easier today.

Rev. Greenwood always delivers excellent sermons and last Sunday evening gave an exceptionally interesting one as a baccalaureate sermon to the class of 1928. It left with the class many suggestions that should be helpful during their future lives.

Mrs. Emil Giegling and Mrs. Roy Milnes entertained with a miscellaneous shower on Monday evening to compliment Miss Thana Smith whose marriage to LaVere Cushman will take place today. She received many beautiful gifts from those present.

Mrs. Cletus St. Pierre of Niles, who has been a guest here was the guest of honor at a party given by her friends at the home of Mrs. Tracy Nelson Monday evening. Mrs. Ernest Borchers won the prize in a guessing contest. A delicious pot luck lunch was served.

Quite a number of the Oddfellows formed in a body and attended services at Michelson Memorial church last Sunday, where Rev. Greenwood delivered the Memorial sermon. From the church the lodge marched to the cemeteries to decorate the graves of deceased members.

Jess Sales, accompanied by some friends, and Mrs. Dodson motored up from Detroit last Saturday to accompany Mrs. Sales home who had been spending a couple of weeks here visiting her father Lars Nelson. The party also visited Mr. and Mrs. Raas in Johannesburg.

An alarm of fire at 5:30 o'clock last evening caused a lot of excitement as a terrific wind was blowing. Someone saw smoke coming through the doors of the Nels Olson garage and thought the building was on fire, but Lester Olson was working on his car and the smoke was only exhaust coming from the car.

Enos Jennings and his bride arrived yesterday from Detroit and are visiting his mother, Mrs. Frank Jennings. The young couple were here last week. Also Mrs. Jennings is enjoying a visit from her son Steven and her daughter, Mrs. Fred Harland and little son, also of Detroit.

Ellsworth Lauridsen entertained 16 boys and girls at dinner at his home Tuesday evening, the occasion being his 14th birthday. Favors of baskets filled with nuts were given to each guest and after dinner Ellsworth took his guests to the movies. He was the recipient of many nice gifts and he proved a royal host.

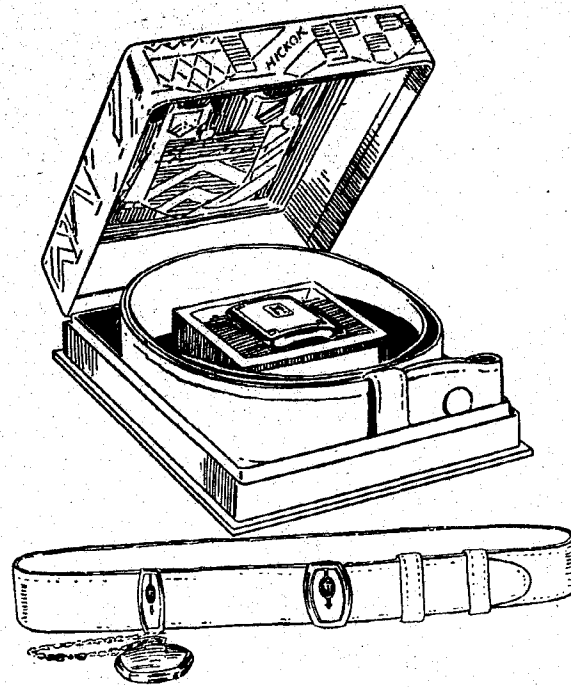

Mrs. David White was guest of honor at a surprise birthday party at the home of her daughter, Mrs. Tracy Nelson, Saturday, the affair being given to celebrate her 61st birthday. Cards were enjoyed and Mrs. White was presented with several gifts. Mr. and Mrs. L. Y. Crandall and Mr. and Mrs. Lawrence Goodrich motored up from Flint for the occasion. There were several other relatives and friends present.

John W. Blodgett of Grand Rapids is in the city where he is gathering plans for the construction of a memorial building for the Hartwick Memorial pines park. Mr. Blodgett's father was in the logging business during the famous fire days and at a young man the former became very familiar with logging conditions. It appears that Gov. Green made a wise choice in Mr. Blodgett for a person to head a committee to plan the memorial. In a conversation with Mr. Blodgett it is learned that the memorial will be built up around an old time pine logging camp, comprising the usual bunk house, mess hall, etc. In these structures will be furnishings, relics of the old pinery days. The job has been put up to Mr. Blodgett by the Governor, including the construction of a suitable highway to the park.

Hosiery Sale! 20 per cent off in all women's Iron Clad hose at Olson's.

Many new shoes just arrived for the whole family at Olson's.

Rev. and Mrs. Kjolhede have returned from Clinton, Iowa.

Born on June 11th to Mr. and Mrs. Sidney Robarge a daughter, Georgina Ellen.

Mr. and Mrs. Thom of Ontario have been visiting at the Jos. Fournier and Thomas Canniff homes.

Miss Ethel Ostrander is spending some time at the home of her sister Mrs. LeRoy Scott of Roscommon.

The Misses Mildred Ostrander and Hilda Heath had as their guest Miss Irene Morgan of Alpena over Sunday.

Mr. and Mrs. Benjamin Jerome and family of Lansing are expected to come Saturday to spend the summer at their cottage at Lake Margrethe.

Mr. and Mrs. Charles Ostrander and Mr. and Mrs. LeRoy Scott of Roscommon entertained Mr. and Mrs. Ira Morgan and family and Mr. and Mrs. William Schyers of Alpena Sunday.

Miss A. Ingeborg Hanson was hostess to a few friends at her home on Thursday evening. Cards were enjoyed and Miss Hanson served a delicious lunch to her guests.

Frank Wilbur, 60 years old and a brother of Mrs. E. G. Shaw passed away suddenly Monday shortly after noon. The funeral was held Tuesday afternoon with interment in Elmwood cemetery.

John Erkes and his bride are nicely settled in one of the cottages in the vicinity of the Hospital building of the Military reservation. Mr. Erkes is employed by the military department and so they will be here for the summer. Coming to Grayling shortly after their marriage, they were greeted by friends of the groom with an old time shivaree. John has many friends in Grayling who extend to the young couple congratulations and best wishes.

Mrs. Roy Wolcott had a narrow escape last Sunday morning, when in kindling the morning fire with kerosene, an explosion occurred and soon the whole house was in flames and burned to the ground. They had no time to save anything except one chair, and carried no insurance. The building was owned by David LaMotte and was insured. The Wolcott family had been in quarantine, their daughter Ellen being ill with scarlet fever.

The last quarterly conference of the year was held in the Michelson Memorial church parlors last evening with Dr. Cookson, district superintendent presiding. To add pleasure to the meeting a pot luck supper was enjoyed by the official board. The full church report for the year was read and it was voted to ask Rev. J. W. Greenwood to remain for another year with an increase in salary of \$500. This was Dr. Cookson's last trip to Grayling. He was accompanied by his son.

A very pleasant affair was given Tuesday evening by the Good Fellowship Club at the summer home of Mrs. H. A. Bauman. It was a farewell dinner for the members who are leaving Grayling and will no longer be affiliated with the Club. After the dinner, Mrs. Oscar Schumann, president of the Club, made a few remarks and introduced Mrs. Alexander as the toastmistress of the evening. Mrs. Tromble responded to the toast. The early years of the Club, Mrs. Marius Hanson—The humorous side of the Club, Mrs. Ernest Larsen—The Club from the standpoint of an officer, Mrs. Bates—The generosity of the Club. The remainder of the evening was spent playing bridge, Mrs. Lorane Sparkes holding the high score.

See the men's golf hose at Olson's.

Billy and Jack Callahan are spending a few days in Cheboygan.

Mrs. F. J. McClain is assisting in the Grayling Mercantile store on Saturdays.

Frank Milks accompanied his brother Lyle and wife home from Detroit last Friday and is spending several days here renewing acquaintances with old friends.

Miss Coletta Smith was in Bay City over the week end.

Get Women's silk hose at 20 per cent off the regular price at Olson's.

Born to Mr. and Mrs. Charles Allen Saturday, a son, who has been called Fred.

A daughter Beth Ann was born to Mr. and Mrs. Herman Bert Jr., of Roscommon at Mercy hospital on June 7. The mother was formerly Beatrice Brott.

FREDERIC SCHOOL COMMENCEMENT

Class Day and Commencement exercises of the Frederic Schools were the programs were as follow: even better than in former years.

Class Day Program

Song—Santa Lucia—High School Girls.

Class flower—Mary Bender.

Class colors—Doris Corsaut.

Solo—Dream Garden—Esther Barber.

Play—"That Rascal Pat."

Characters:

Major Puffjacket—Helen Woodburn.

Laura, his niece—Doris Corsaut.

Nancy, Laura's maid—Mary Bender.

Charles Livingstone—Keith Forbush.

Pat, an Irish servant—Ralph Cline.

Love's Old Sweet Song—Lida Horton, Rosalie Stammaler.

Accompanist—Helen Woodburn.

Commencement Program

March, Athalia—Helen Woodburn.

Invocation—Rev. D. N. Earl.

Salutatory—Doris Corsaut.

President's address—Keith Forbush.

Graduation Song—Ethel Wixson and Ethel Richards.

Oration—"Is it worth while?"—Ralph Cline.

Valedictory—Mary Bender.

Solo—"Softly the wind sighs to night"—Esther Barber.

Address—"The Spirit of Progress"—Prof. F. E. Robinson, Mt. Pleasant.

Presentation of Diplomas—Sec. C. S. Barber.

Presentation of Seventh Grade certificates and Eighth Grade diplomas—Comm. John W. Payne.

Benediction—Rev. D. N. Earl.

Class motto—"We build the ladder by which we rise."

A large audience listened to the baccalaureate address given by Rev. D. N. Earl in the Methodist Protestant church. Mr. Earl's sermon contained many excellent thoughts and was exceedingly well received. The address given by Prof. Robinson in the High School auditorium was the best of his addresses given in Fredric, and it was equally well received. The parts rendered by the graduates in the exercises revealed their careful training and many compliments were extended to them by their appreciative relatives and friends.

The music rendered was of a high character, thus calling to mind again as has been suggested by so many people visiting Frederic that we have reason to be proud of our musical talent.

So with the suggestions given by Supt. M. A. Kopka that we are meeting the approval of the State Department and the University of Michigan, let us strive to make the school year of 1934 and '35 the best ever.

Can only fruits and tomatoes by the water-bath method; use the pressure canner for the non-acid vegetables, for meats, fish, chicken, or mixtures of these foods.

To keep the undercurrent of your rhubarb pie from becoming soggy, pre-bake it until it is deliciously colored, but not brown, before you put in the filling. If you have a glass or earthenware pie plate, you can send the pie in it to the table.

When fitting a garment, try the seams in different positions, especially those of the shoulder. Study the figure to find the position which will emphasize the best features and conceal those which are not so good. It is better to put the attention on the fitting of the figure, rather than on keeping the lines of the pattern.

Spring onions can be served on toast in the same way as asparagus. Allow six or seven finger-sized onions for each person. Trim off the green tops, and cook the onions in lightly salted boiling water until tender, in an uncovered vessel. They should be cooked tender in about 20 minutes. Drain, and season with melted butter, salt and pepper. Have the toast ready and serve at once.

McGILLIVRAY'S WOLVERINE CLAIM SUPPORTED

(By E. M. T. Service)

James McGillivray, wild life photographer, whose claim that wolverines formerly existed in Michigan confines has been doubted now offers considerable data in support of his position. He says:

Dr. Norman A. Wood, U. of M., in his new book on birds and mammals of Michigan soon ready for the press, in his text on wolverines will probably begin his discussion by stating its early presence in Michigan with one killed by C. F. Smith near Forestville, Sanilac County, 1884, which weighed about 40 pounds and was pronounced by all the old trappers of that region to be a wolverine.

"Next in order would come the positive statement of L. D. Watkins, Manchester, that he shot a wolverine, 1885, near Au Sable River, Iosco County.

"Then would come C. E. Herring, Ontonagon, stating that in a period, 1850-1875, he purchased fur pelts of five wolverines, 'some if not all taken in that region.'

"Mr. E. N. Woodcock, Schoolcraft County, tells Dr. Wood that he caught a wolverine on Manistique River, winter 1876, and saw tracks of others.

"S. D. Allen, pioneer of Sanilac County, states that he saw tracks of wolverines there, 1879-1880.

"Vernon Bailey, U. S. B. S., cites the killing of a wolverine by a Mr. Archer, near mouth of Elk Creek, Sanilac County, Oct. 17, 1873.

"Mike Loshen, Ewen, found a wolverine, dead, near that town, May 1915, near a poison station made by Mr. Erick Langren of Ewen. Body of a large male.

"W. W. Weaver, Reading, probably the oldest buyer and dresser of furs in Michigan, states that he purchased numbers of wolverine pelts taken in Michigan, one taken by a man from Reading.

"J. B. Harkin, Commissioner Nat'l Parks of Canada, asserts that the wolverine was formerly found in Michigan and is still found 'widely distributed in Canada.'

USEFUL INFORMATION

Can only fruits and tomatoes by the water-bath method; use the pressure canner for the non-acid vegetables, for meats, fish, chicken, or mixtures of these foods.

To keep the undercurrent of your rhubarb pie from becoming soggy, pre-bake it until it is deliciously colored, but not brown, before you put in the filling. If you have a glass or earthenware pie plate, you can send the pie in it to the table.

When fitting a garment, try the seams in different positions, especially those of the shoulder. Study the figure to find the position which will emphasize the best features and conceal those which are not so good. It is better to put the attention on the fitting of the figure, rather than on keeping the lines of the pattern.

Spring onions can be served on toast in the same way as asparagus. Allow six or seven finger-sized onions for each person. Trim off the green tops, and cook the onions in lightly salted boiling water until tender, in an uncovered vessel. They should be cooked tender in about 20 minutes. Drain, and season with melted butter, salt and pepper. Have the toast ready and serve at once.

Fishing for Sturgeon

The bureau of fisheries says that the sturgeon is caught by snagging. It will not take any bait. Snagging is done with a hook and line. A very heavy line (three inch) is used for the line about one-eighth inch in diameter. The hook should be very stout and from three to four inches in length.

Tobacco as School Prize

If a schoolboy makes a perfect recitation in some school of Mexico the teacher gives him a cigar and it is the pupil's privilege to smoke it then and there. Sometimes if the whole class conducts itself in an admirable manner, the teacher will then distribute cigarettes. The teacher light up and the school ground goes on amid fragrant clouds of smoke.

NEWS REVIEW OF CURRENT EVENTS

Four Aviators Make Flight Across Pacific Ocean in Three Big Hops.

(By EDWARD W. PICKARD)

CALIFORNIA to Australia by airplane in three hops! For the first time the Pacific ocean has been traversed by the air route, the great feat being accomplished by two Australians, Capt. Charles Kingsford-Smith, war ace, and Charles T. P. Uim, and two Americans, Harry W. Lyon and James Warner. Their machine was the monoplane Southern Cross, once used unsuccessfully in the Arctic regions by Captain Wilkins.

In constant communication with the mainland and with vessels by radio, the girmen made the flight to Hawaii without much trouble. The worst part of the trip was the next hop, nearly 8,200 miles to the Fiji Islands, and during this they ran into repeated storms that were most skillfully dodged by Kingsford-Smith, the chief pilot. This was the longest overseas flight ever made, and if they had been forced down before reaching Suva the only possible places to light without disaster were two coral atolls in the Phoenix group, 1,866 miles from the starting point in Hawaii. As it was they landed safely at Albert park, Suva, with only 30 gallons of gas left in the tanks, having made the hop in 34 hours and 33 minutes. Wilkes and Uim of Fiji joined in giving the flyers a rousing welcome. After a brief rest the plane was flown to Nansel beach for the take-off for Brisbane, Australia, 1,762 miles away, the route taking the airman through a region of frequent storms, south of the Loyalty Islands and New Caledonia. From Brisbane they were to fly to Sydney, 500 miles to the south.

Sydney newspapers printed the report that Captain Kingsford-Smith was on the brink of insolvency and started a campaign to raise a fund for him. When the trans-Pacific flight originally was planned Kingsford-Smith sought the aid of the Australian government and it was promised. Advance payments purchased the plane and the flyer came to the United States. There followed the disastrous Dole flight from Oakland to Honolulu in which seven lives were lost. The Australian government withdrew its support and urged Kingsford-Smith to return home. He refused and continued plans for the California to Australia flight on limited resources and finally obtained backing from Allen Hancock, millionaire oil man of Los Angeles. But even with this backing the flyer faces financial ruin.

During the week there were reports, based on alleged radio messages, that Nohle and the dirigible Italia were on Franz Josef land east of Spitzbergen. Search for the missing explorers was continued by the steamship Hobby, by Lieutenant Holm, Norwegian aviator, and by parties of Alpine chassuers. The Italian department of aeronautics was in communication with Captain Wilkins, hoping to induce him to join in the hunt by air.

SO FAR as the Republican national committee was concerned, Herbert Hoover was given nearly all the contested Southern delegates in the hearings conducted at Kansas City. The contests, however, it was stated would be carried before the committee on credentials and possibly before the convention. In the committee hearings the secretary of commerce won 85 out of 78 contested delegates; his most impressive victory being in the case of Texas in which he gained the entire delegation. By conservative estimates this brought the total number of Hoover votes to 472, the majority necessary to nomination being 545. The experts then figured that Mellon with his 79 Pennsylvania delegates could put Hoover across the line—if he chose to do so. The contest for the South Carolina delegation, which was for Lowden, was withdrawn by the Hoovers.

Among the politicians gathered in Kansas City many expressed the opinion that Senator James Watson of Indiana or Senator Charles Curtis of Kansas would make a good vice presidential nominee. Some Hooversites especially favored Watson for second place, figuring his nomination would "pull the string of the corn belt."

Farmer crusaders of the regions surrounding Kansas City were preparing to move on the convention city in considerable numbers, by automobile and train, and many of them wore badges on which was printed this amended version of the Hoover slogan: "Who but Hoover? Anybody."

ACCORDING to the partial report of the senate campaign fund committee, total expenditures in behalf of the various Presidential candidates to date have been only \$731,087. Of this sum the Hoover expenditures have been \$380,822. Frank O. Lowden is credited with having spent \$60,922.90. The committee found \$579.80 has been collected and expended by the supporters of Vice President Dawes. The expenses of Governor Smith of New York, leading Democratic aspirant, were \$121,471.04. Collections to the Smith fund amounted to \$120,911.40. The Reed preconvention campaign fund amounted to \$41,490.04. His expenditures are listed at \$38,752.79.

GEN. JOHN J. PERSHING made a rush trip from Paris to Cherbourg and jumped aboard the Levantian for the United States, and both in New York and in France the report was circulated that he was called home hurriedly by friends who were starting a boom for him as a dark horse can didate for the Republican nomination for President.

MARSHAL CHANG TSO-LIN, Northern war lord, gave up his dictatorship and abandoned Peking to the Nationalists. With his household he fled to Manchuria and just as his train reached Mukden it was bombed, presumably by Nationalist agents. Some soldiers were killed and Chang himself was so badly injured that his recovery was considered doubtful.

The Nationalist troops gradually occupied Peking while forces left by Chang and those of the foreign legations strove to prevent disorder. General Bai-shen, for years known as the military governor of Shantung province, was appointed garrison commander of the Peking-Tientsin area and at once began the work of reconstruction and development. The Nationalist government asked the immediate evacuation of American troops from Tientsin, where the United States has maintained part of a regiment since the Boxer rebellion. In Washington it was stated that our government could not comply with the request at once.

gathered in the Texas city, and paraded along the sea wall. Miss Ella Van Hueson, the entrant from Chicago, was first chosen as "Miss America," and then, being adjudged the most picturesque of the whole lot, was crowned "Miss Universe." She is twenty-two years old, tall and slender, with long dark brown hair. The other prize winners in their order were the girls from France, Italy, Colorado, West Virginia, Canada, Luxembourg, Ohio, San Antonio and Tulsa.

THE DISABLED DRIVER'S CLUB

(By Erwin Greer)

(President Greer School of Electrical and Automotive Trades, Chicago, Ill.)

A disabled driver's motor club is the latest development in England. It's chairman, R. H. Austin, pointed out the difficulty of finding a definition of physical disability such as would drive a person from the right to drive a car. Some years ago he underwent amputation of both his legs, but nevertheless he has covered an average of 20,000 miles a year in his car, and offered to drive a magistrate, who appeared to believe in physical tests for motorists, either through the city at mid day or at any speed he liked at the Brooklands racetrack. Says the British Medical Journal, London, in a discussion of the matter:

"Austin drives his car in the ordinary way by means of his artificial limbs. The members of his disabled drivers club are mostly deficient in one or two limbs. Blindness is probably the only defect which can be said certainly to be a bar to motor driving. Deafness need not incapacitate, since the deaf can train their eyes to greater perfection than the ordinary man attains. Defect in limbs either from amputation or paralysis, does not necessarily disqualify, as Austin has shown. There remain for consideration certain diseases or conditions, such as heart diseases, epilepsy, apoplexy, alcoholism, neurasthenia (which in police courts appears to have some affinity to alcohol) insanity, and old age. None of these conditions seem to be sufficiently amenable both to diagnosis and prognosis to make systematic examination of motor-drivers justifiable.

"It may be agreed that a man with aortic disease or angina pectoris, is epileptic, an insane person, and perhaps a man who has had a stroke, ought not to drive motor cars. But the number of persons who attempt to do so must be small, and the number of such persons who become involved in accidents still smaller. And though serious heart disease or the paralysis following a stroke are detectable, how is the epileptic or the madman to be made to give himself away? As for the alcoholic, the neurasthenic, and the aged, few medical men would care to fix limits in these conditions within which driving might be considered safe.

If a man of eighty is to be barred because of his age from jog-trotting into the neighborhood village in his light car, why not make searching inquiries about the man who may have happened on some occasion to go to sleep at the wheel? It would probably be useful if the medical profession told the public authoritatively that in certain circumstances a man should refrain altogether from driving motor cars."

Only a part of the tax, interest and penalties assessed against the oil man was understood to be for his alleged profits from the Continental Trading company, an adjunct of the Teapot Dome case.

LITHUANIA'S assertion, in her recently adopted new constitution, that Vilna is the capital of the country was denounced before the League of Nations council by Poland when the council opened its fifth session in Geneva. Foreign Minister Zaleski submitted a copy of his note of protest to Kovno in which he asserted this could only envenom the Polish-Lithuanian relations. Lithuania's claim, he said, had no juridical foundation as Poland's rights over Vilna were definitely established by the Vilna and Polish diets and by the ambassadors' conference in 1924. It was not believed this session of the council would do much business as both Briand of France and Stresemann of Germany were absent on account of illness.

VIENNA received reports, seemingly authentic, that Ahmed Bey Zogu, President of Albania, was getting ready to proclaim a monarchy with himself as the king. He has had a stormy career, fighting with the Democrats and Liberals and once being wounded by an assassin. In December, 1924, he led a successful revolt against Bishop Noli's rule and next month was appointed President by the national assembly. He is only thirty-four years old and besides being President has held the offices of premier and commander in chief of the national forces.

PREMIER MUSSOLINI took a good deal of wind out of the sails of his detractors by the restraint of his annual address before the Italian senate. His hearers were especially interested in what he might say about the threatening situation in the Balkans, but the Duce cut out all violent talk and made a plain offer of friendship to Yugoslavia. Then he denied the idea of enmity. He declared Italy could not wait forever for Yugoslavia to settle its domestic problems, and warned that treaties would be no good anyway if a friendly, moral atmosphere between the two peoples was not developed. He ridiculed the prediction made by a former Yugo-Slav minister that war soon would break out between the two countries, ending with a peace signed at Venice. He had nothing to say concerning the disputes with Austria about Upper Adige, but announced that a treaty would soon be signed with France that would settle all outstanding differences between the French and Italians.

Mussolini spoke at some length about the astonishing growth of the United States in wealth and world power. He said he had no complaint to make against American immigration restrictions and the Italian quota, though deploring the reasons which prompted the legislation. "As for the naturalized Americans of Italian origin," he continued, "they are American citizens and therefore foreigners so far as we are concerned. We limit ourselves to hoping they will continue to be proud of their Italian origin."

ATLANTIC CITY having abandoned its annual beauty contest, the "International pageant of polychrome" held in Galveston attracted the attention of those who enjoy such affairs. Selected beauties from many states and a number of foreign countries

LOVELLS NEWS

Mrs. B. W. DeGuilchard entertained a party of friends at "The Nash Kamp."

Mr. and Mrs. Alfred Nephew and family, Mr. and Mrs. Francis Nephew and Ray Doby were Sunday guests of the Roy Small family of Mio.

A daughter was born to Mr. and Mrs. George Stuart. She will be known as Barbara Jean.

Mr. and Mrs. Joseph Doby spent Sunday at Mio.

Mrs. A. R. Caid enjoyed a visit from her sister and husband of Lansing.

Roy Small was a Lovells caller Monday.

A nurse from Lansing was here Monday calling on the babies.

Henry Bowen of Grayling was in Lovells Tuesday.

The B. W. DeGuilchard family are spending the week at their home in Flint as Mrs. DeGuilchard's son Charles is expected home from school.

Bessie Small is spending the week with her sister, Mrs. Francis Nephew.

Wm. Mershon, Jr., of Saginaw was here to bury an old pet dog.

Mr. Ed. Kellogg, who is employed at Bay City returned home to attend school election.

School election was held Monday evening, Roger Caid being reelected as moderator for Dist. No. 1.

Mrs. Percy Budd and daughter Della made a trip to Grayling last week.

Mr. and Mrs. Len Phillips and niece Clara Henderson of Roscommon spent the week with John Haric.

Mr. and Mrs. Joseph Kennedy of Lewistown were callers here.

Conrad Howse was in Lovells last week.

Mr. and Mrs. Percy Budd and family spent Sunday at the home of Mr. Budd's sister of Mio.

The Norman Hennie family of Saginaw are staying at the Bill cabin.

Fred Rowe of Detroit was here a few days to enjoy the fishing.

Shakespeare Wrong

Shakes do not sting though Shakespeare veraciously speaks of the stinging of serpents or adders. They bite and the venomous snakes inject poison from a poison gland by means of a fang. Our venomous snakes consist of several kinds of rattlesnakes, the water moccasin and the copperhead.

Origin of Slang Phrase?

The slang expression "He's a hell bender" came possibly from a large salamander called the hellbender, found chiefly in the streams emptying into the Great Lakes. This is an extremely ugly but perfectly harmless creature that is exceedingly tenacious of life and hibernates in cold weather.

GRAYLING OPERA HOUSE COMPANY BOND ISSUE

Notice to Bond Holders

Bonds bearing the following numbers have been drawn out for redemption and are payable at once:

1, 11, 19, 35, 36, 43, 55, 65, 80, 88, 103, 117, 121, 128, 131, 135, 139, 147, 149, 152, 154, 157, 163, 184, 192, 197, 223, 238, 250, 266.

Please hand your bonds to the secretary at your earliest convenience and receive check for principal and accrued interest.

John Bruen, President.

Grayling Opera House Co.

Carl W. Peterson, Sec. Treas.

GLANCY PROVES HE WAS WRONG

Twenty-Five Years Ago He Wrote "Auto Useless Invention"

Pontiac, Mich.—Back in 1903 two bright young students at Lehigh University collaborated in writing a pessimistic thesis which scornfully criticized the automobile as "a fitch man's toy, a useless invention with no future."

Their treatise was based upon personal experience with several popular cars of the day, including the long-forgotten Knox which reared a lone and sizzling cylinder head right up through the floor-boards.

The students experimented also with some of the first four-cylinder cars which then were breasting a stream of adverse advertising sponsored by the single cylinder manufacturers who drew discouraging comparisons between the complexity of "handling four small horses instead of one big, powerful horse."

But one cylinder or four, the young essayists condemned the entire horseless carriage idea as unsound, impractical and doomed to certain failure.

Today, a quarter of a century later, both of the former Lehigh students are actively refuting their collegiate conclusions. One of them has just placed in operation a \$5,000,000 addition to a \$25,000,000 group of automobile factories. He is A. R. Glancy, president and general manager of the Oakland Motor Car Company. The other is Paul Gerhard, president of Paul Gerhard Motors, Omaha, Neb., who sells the Oakland and Pontiac Sixes which his former chum manufactures.

Coming to Grayling, Mich.

Dr. Hanson

Specialist

in internal medicine demonstrating his system of treating diseases and deformities without surgical operation

WILL GIVE FREE TREATMENT at the

Shoppenagons Inn

Thursday, June 21

Office hours: 9 a. m. to 4 p. m.

ONE DAY ONLY

Dr. Hanson is well known in Michigan, reliable and has many patients. He will give his professional services free of charge to all those who call on him this visit.

According to his method of treatment he does not operate for chronic appendicitis, gall stones, ulcers of stomach, goitre, tonsils or adenoids.

He has to his credit many wonderful results in diseases of the stomach, liver, bowels, blood, skin, nerves heart, kidney, bladder, bed wetting, catarrh, weak lungs, rheumatism, sciatica, leg ulcers, hemorrhoids or piles, and slow growth in children.

If you have been suffering for any length of time do not fail to call, as improper measures rather than disease are very often the cause of your long standing trouble.

Remember above date and that his services on this visit will be free, making only a charge for medicine in cases which are accepted for treatment.

Married ladies must be accompanied by their husbands.

Address: Dr. Hanson, Medical Laboratory, 311 Reid Building, Detroit, Mich. 6-7-2

Take your prescriptions to the Central Drug Store.

Jiffy

FOR Bunions

wear new shoes with jiffy

You can do it with JIFFY. A home treatment, thin as paper, easily applied; and it stops the growth. Absolutely guaranteed, and you are the only judge. Also Jiffy for Corns and Calluses. Each 25c.
